

W-L High School Alumni Association School Tour Information

Prepared by:

Betsy Zimmerman Lockman ('60)

Tour Coordination Elements

*Tour guides are asked to wear a name tag and your alumni shirt if you have one!

*Elevators operate without a code on Saturdays. See the Facilities Manager if you need a code during the week.

*Access to all the rooms specified in this information packet are effected by the maintenance staff. The Facilities Manager has authorized them to be opened prior to your tour time.

*Be certain to close all doors as you leave the rooms. Lights come on and go off automatically.

*Try to make accommodations if someone in the tour group can't walk up/down stairs.

New Building

Address: 1301 N. Stafford Street, Arlington, VA 22201, 703-228-6200

**LEED certification = Leadership in Energy and Environmental Design
from US Green Building Council*

Smart Growth planning principles = open space, abundant pedestrian connections, connects neighborhoods

12 Points of LEED =

1. Site Selection – built up rather than sprawling building
2. Alternative Transportation – access to public buses, bike riders
3. Heat Island Reduction – used light colored concrete and roof gardens
4. Water Efficient Landscaping – uses no permanent irrigation system
5. Construction Waste Management – 92% of scrap metals recycled: used recycled concrete, metal, brick, drywall, wood, glass, plastic, etc.
6. Construction Indoor Air Quality (IAQ) Management – diligent about keeping site clean during construction
7. Water Efficiency – dual flush toilets, waterless urinals
8. Energy Efficiency – lights go on when rooms in use; off when not. Cooling/heating only in areas being used
9. Recycled Content – materials used are from recycled sources
10. Regional Materials – 27% of materials came from within 500 miles of site
11. Outdoor Air Delivery Monitoring – carbon dioxide sensors in rooms monitor level and provide fresh air when too high. Keeps kids alert in class!
12. Low-Emitting Materials – used in building to keep Volatile Organic Compounds (VOC's) at low amounts: paints, sealants, carpets, adhesives. Promotes good health.

*TC Williams in Alexandria was certified LEED Gold in 2007

*W-L was certified LEED Gold in 2009 Cost: approx. \$100 million

*Wakefield High School was certified LEED Gold in Sept. 2013 -trying for Platinum certification

*Yorktown High School was certified LEED Gold in 2014

*W-L Capacity Optimization Project and LEED Certification – 2015-16

“The scope of the proposed modifications is not sufficient to pursue LEED Certification. However, the project will be implemented as though it were pursuing LEED. Green building design principles and best practices will be followed throughout the design and construction process. “

Note: 92% of waste generated during construction was recycled; concrete, metal, asphalt, wood, cardboard and plastic.

14% of the materials for W-L were made from recycled materials including insulation and ceiling tiles.

Information about the \$5M – CAPACITY OPTIMIZATION PROJECT
Moving from 1,900 to 2,200 instructional seats....Completed in 2016

- Limits on land dictate that expansion of the building cannot allow growth. Strategies were needed to get more use out of the existing facilities. W-L was the first 21st Century high school in Arlington County and opened almost a decade ago. It now needs to have adjustments made to adhere to the evolving world of education.

- The school has maintained eight relocatable classrooms to add more seating: A goal of this project is to remove those temporary buildings.

- A study was launched in 2014 to evaluate the situation and recommend a solution. The current project is addressing the issues: The utilization of available seats throughout the full seven period day. In order to use the classrooms (seats) over a full day, teachers had to be provided with work spaces for effective collaborative planning away from their instructional room assignments.

-The following modifications addressed 4 sets of issues to achieve the three goals of the Capacity Optimization Project and were completed in the 2016 school year.

1. Increasing Classroom Capacity
 - installing operable partitions to split large rooms into two smaller rooms
2. Providing Teacher Collaboration Spaces
 - having large-scale central suites and small “drop-in” spaces on all 3 upper floors
3. Addressing Other Capacity Limits
 - expanding use of the concourse, veranda and courtyard to be used during lunch periods
 - improving conditions for IB and AP testing
 - relocating Principal’s office to the Concourse to make central administration more accessible to students, teachers and community
4. Furnishings and Technology
 - provide flexible and adaptable furnishings throughout the building
 - Wi Fi capabilities strengthened and charging stations installed throughout the building

You mean to say that a high school, this high school — Washington-Lee — has an alumni association?

Yes it does ... an alumni association is not just for colleges any more. You will be pleasantly surprised to discover how active this association is in keeping that General spirit alive. As of Summer 2017, we now have had 92 graduating classes, from the smallest of 1926 (also the first class, with a single graduate) to our largest, 1955 (913, with class president Warren Beatty leading the way). That adds up to nearly 40000 students passing through these halls in those nine decades.

The W-L Alumni Association was formed by a nucleus of people involved with the 75th anniversary celebration at W-L, in 1999. Over the intervening years, the momentum has built and the W-L Alumni Association has become a vital member of the W-L community.

The mission of the Alumni Association is to keep W-L alums connected to each other and to the current school as best as possible. Some of the activities we are involved with:

- Hold open meetings with programs of general interest to the alumni community on a regular basis throughout the year.
